SUMMARY

As a full-stack developer specializing in React.js and Node.js, I have gained extensive experience over the last year. My profile can be summarized as follows:

- Front-end Development: I am proficient in React.js, a popular JavaScript library for building user interfaces. I have a good understanding of React components, JSX syntax and React Router for handling navigation.
- API Development: I have developed RESTful APIs using Node.js and Express.js, implementing features such as authentication and authorization. I am familiar with API documentation tool Postman.
- Database Management: I have experience in working with SQL database.
- Developing and maintaining responsive web applications using React.js and Node.is.
- Implementing user interfaces and enhancing the user experience with smooth interactions and visually appealing designs.
